

# DIN 04 TX

Electronic Dynamometer with radio transmission

## TECHNICAL DATA

The dynamometers 04 are instruments of high accuracy for the measurement of static forces of traction and of static load with radio transmission of the weight.

The instrument works with all direction of the load and it's equipped with a case which contains the instruction booklet and calibration certificate.

Main characteristics are:

- Tare zeroing and weight restore
- Block-unblock on the visualized weight
- Maximum weight peak
- Visualization of the Gross, Net weight and Tare
- Measuring unit selection  
(kg → t → ton → Lbs → daN → kN)
- Speed selection
- Self power-down qualified
- Digital calibration of zero and weight
- LCD five digits - high 0,67 inch
- Power supply-NiMh rechargeable battery (life up to 100 hours)
- Choice of unit of measurements  
(kg → t → ton → Lbs → daN → kN)
- Tare function
- Transmitter working frequency: 868 MHz multichannel
- Overload indication on display (110% f.s.)
- Variable response rate by keyboard
- RXDI02 hand receiver included
